

What Your.NET Team Already Has for AI Success

You don't need a new stack—or new people. You already have the skills that matter most.

AI Requirement

-  Data handling at scale
-  Secure system design
-  Scalable APIs and service layers
-  Production-grade reliability
-  Complex business logic modeling
-  Regulatory and compliance awareness
-  Tooling and debugging discipline
-  Language and framework fit

Your .NET Team Already Has

-  Deep experience with SQL Server, EF Core, LINQ
-  Role-based auth, encryption, token management
-  REST APIs, gRPC, background workers
-  CI/CD pipelines, rollback strategies, monitoring
-  Object-oriented, typed systems with layered architecture
-  Systems built under PCI, HIPAA, GDPR, NIST requirements
-  Visual Studio, Application Insights, structured logging
-  Full support for ML.NET, ONNX, Azure AI, Semantic Kernel
